### Data Visualization and Analysis Services

Data Visualization is the graphical presentation of information, with the goal of providing the viewer with a qualitative understanding of the information (data, process or concepts). With interactive techniques we are able to provide the information from multiple views and angles aiding the process of business strategic and operational decision making. Our services include dashboards, scorecards, reports, graphs, trends, forecasts and business intelligence portals built on leading edge technology platforms.

### Data Warehousing Services

Have you identified whether your organization needs an Enterprise Data Warehouse or a Data Mart or an Operational Data Store? We will assess your needs, evaluate existing processes, and propose solutions in data warehousing to meet your needs for today and tomorrow. We will architect the data blue print and implement the designed solutions to integrate & summarize your enterprise/departmental data. We will help users to apply the right tools and techniques offered by Information Technology for better decision making.

### Data Management Services

We provide diverse data management services in Data Stewardship & Governance, Data Architecture, Data Integration, Data Consolidation, Meta Data & Master Data Management, Data Profiling & Data Quality and Data Security.

### BI Project Management Services

Business Intelligence projects are different in many ways than other Information Technology projects. Wisdom provides IT strategy planning and project management services for a business intelligence project.

### BI Support Services

We provide Support and maintenance services to keep the current BI system available. We also provide Database and tools administration services that will ensure database availability.

## BI Implementation Methodology

Building a complete business intelligence system spanning over all the departments/business processes of the enterprise can turn out to be an expensive proposition.

BI Road Map  
Project Goals  
User Team  
Technology Stack

Project Plan  
Requirements  
Analysis  
System Design

Develop  
Unit Test

System Test  
Load Test  
Acceptance Test

Production  
Deployment  
User Training  
Support Training

We follow a systematic approach to implement the system for one department/ business process at a time. You add more departments/business process to your BI system as your company grows and expands. This way the cost to build the BI system is more manageable and the lessons learnt during one implementation exercise can be leveraged during the next implementation.

## Why choose Wisdom InfoTech?

Wisdom InfoTech will bring you the following benefits

- \* Innovative solutions provider
- \* Risk Sharing partner
- \* Experience Customer Delight first hand
- \* Reliable and Scalable Solutions
- \* Well documented processes
- \* Single stop shop for all your BI needs

Please call us and our technology professionals will come in to assess your needs and understand your problems. We will provide you with a customized benefits analysis to evaluate how and where we can bring value to your organization.
